
Solucionario Fisica Y Quimica 1 Bachillerato Anaya Rapidshare

A: The error is in the definition of the if condition: `if(match!= null) { match = match.clone(); }` Here, `clone()` is used for the result of `match.equals(copy)` without checking for the first condition that `match` must be null. A cloned object matches the original one iff the two references point to the same object. So if you don't set the value of `match`, it will always be null and then `if()` will be false. You can probably replace it by `match = copy;`, or if you need it to be nullable you can do `if(match!= null && match.equals(copy)) { match = match.clone(); }` Q: Encoding of Unicode characters for the .NET language model I am using the Microsoft Language Model (.NET), specifically the LUIS model, to recognize various languages in text. The problem is that some of the characters are being treated as words and breaking the model.

Consider the following text: **היא נשיאתו שחודשי חדש על ההפצה שיסור בעזרת מקובעת החלטה הוא סופר ספטמבר בחודש שהוא מסוגל לעבור בעל ראש הממשלה בבחירות השיתוף פוליטי ומדיני** The following text breaks the model into words: **מסו שהוא היא נשיאתו שחודשי חדש על ההפצה שיסור בעזרת מקובעת החלטה הוא סופר ספטמבר בחודש** ♦
