Download ps3 emulator x 1.1.7 biosQ: Custom Class to implement TextWatcher Not working Sorry for the first post on this site, I'm learning how to work with it. I've done some searching but can't find an answer to this problem. I'm trying to take my database to make a card app. I have two problems so far. The first is that I can't seem to get my new card class to register the TextWatcher. When I write the line:
R.id.tvCommentCardLines1.addTextChangedListener(new TextWatcher() {
 @Override public void onTextChanged(CharSequence s, int start, int before, int count) { comments.getComments1(mRowIndex, mColIndex); }
 @Override public void beforeTextChanged(CharSequence s, int start, int count, int after) { } @Override public void afterTextChanged(Editable s) { } });
the app will crash. If i remove the commentwatcher class, the app works fine. The second problem is that I can't get the text written by that
